
Seçkin Oğuz Kurukaya

Full-stack Engineer & Product Builder

Antalya, Turkey · oguzkurukaya@gmail.com · github.com/OguzKurukaya · linkedin.com/in/oğuz-kurukaya-198667105

Computer engineer & full-stack developer with senior backend experience at a high-traffic production app (Faladdin). Builds products end to end — from first line of code to last pixel. Hands-on AI/LLM integration in production environments. Currently leading all development on Sonder, a private relationship journal.

EXPERIENCE

Full-stack Developer — Faladdin

2021 → present · Remote

Core developer on a high-traffic app with a large, active user base.

- Re-architected a legacy PHP system into microservice-based Laravel
- Built an AI chatbot (ChatGPT + Stable Diffusion) + production prompt-engineering
- Refactored & optimized core database systems at scale
- Designed scalable AWS cloud architecture

Laravel · Node.js · Vue.js · AWS · Elasticsearch · Redis · Socket.IO · OpenAI

Full-stack Developer — Papel

2021

- Built an HR management system
- Location-based real-estate search (Google APIs)
- End-to-end admin CRM

Laravel · Vue.js · MySQL · Google APIs

Full-stack Developer — Ajanstek

2020–2021

- E-commerce & CRM solutions for clients
- Custom automation on Laravel

Laravel · T-Soft API · MySQL

EDUCATION

B.Sc. Computer Engineering — Namık Kemal University, 2016–2020
